

Extending WordPress with Themes and Plugins

Appearance (Themes),
Plugins (FAQ, Contact US, CP Google Maps)
Version 5.0 2016 - Plugin name changes

Learning Objectives

- Change WordPress Themes
 - Set WordPress Theme to Twenty Fifteen
- Find, Install, activate and use Plugins
- Create an FAQ Page
- How to add SEO information to Pages
- How to create Contact Us page
- How to create a Google Map on the About Us Page
- How to create Posts
- How to add PHP to a Page to display CMS site MySQL DB table data

Appearance (Theme)

- Use a theme that supports multiple child menus in your WordPress assignment
- **In most cases, the default theme used to create your WordPress site does not support menus or child menus!**
- Themes Twenty Fifteen, Twenty Thirteen are responsive themes that will work on any device and supports menus.
 - Please test your website on mobile phones and tablets

Theme Info As Of 2015

- Twenty Sixteen
 - Top menu **does not support** child menus (submenus)
 - Sidebar **menu does support** multiple child menus ← GOOD ENOUGH
- Twenty Fifteen
 - Top menu **does not support** child menus (submenus)
 - Sidebar **menu does support** multiple child menus ← GOOD ENOUGH
- Twenty Fourteen
 - Top menu does not support multiple child menu
 - It will show one child menu level deep
 - Sidebar menu does support multiple child menus and it looks terrible
- Twenty Thirteen
 - Top menu does support multiple child menus
 - Sidebar menu does support child menus
- Twenty Twelve
 - Top menu does support multiple child menus
 - There is no sidebar menu

WordPress Plugins For Class

- **Easy FAQ with Expanding Text**
- **Basic SEO Pack**
- **Clean and Simple Contact Form**
- **Google Maps CP**

<input type="checkbox"/>	Plugin	Description
<input type="checkbox"/>	Akismet Activate Edit Delete	Used by millions, Akismet is quite possibly the best way in the world to protect your blog from spam. It keeps your site protected even while you sleep. To get started: 1) Click the "Activate" link to the left of this description, 2) Sign up for an Akismet plan to get an API key, and 3) Go to your Akismet configuration page, and save your API key. Version 3.2 By Automatic View details
<input type="checkbox"/>	Clean and Simple Contact Form Settings Deactivate Edit	A clean and simple contact form with Google reCAPTCHA and Twitter Bootstrap markup. Version 4.6.2 By Meghan Nicholas View details
<input type="checkbox"/>	Easy FAQ with Expanding Text Deactivate Edit	Easily create a Frequently Asked Questions page with answers that slide down when the questions are clicked...or a non-FAQ page with the same effect. No need for a shortcode, HTML coding, or javascript tweaking. Version 3.2.8.3.1 By bgentry View details
<input type="checkbox"/>	Google Maps CP Request custom changes Deactivate Edit	Google Maps CP Allows to associate geocode information to posts and display it on map. Google Maps CP display the post list as markers on map. The scale of map is determined by the markers, to display distant points is required to load a map with smaller scales. To get started: 1) Click the "Activate" link to the left of this description. 2) Go to your Google Maps CP configuration page and configure the maps settings. 3) Go to post edition page to enter the geolocation information. Version 1.0.1 By CodePeople View details
<input type="checkbox"/>	Hello Dolly Activate Edit Delete	This is not just a plugin, it symbolizes the hope and enthusiasm of an entire generation summed up in two words sung most famously by Louis Armstrong: Hello, Dolly. When activated you will randomly see a lyric from Hello, Dolly in the upper right of your admin screen on every page. Version 1.6 By Matt Mullenweg View details

What WordPress Version Am I Using?

- Let's Find Out
- WordPress Icon > About WordPress
- It's a good idea to make sure the plugin your using works with (supports) the version of WordPress you're running.
- For this class (as WordPress 4.5.2 just came out) we will have to bend the rules a little

To get the WordPress Version

A screenshot of a WordPress dashboard. At the top, there's a dark header bar with the WordPress logo, the site title "Armadillo Video Game Resale", a comment count of "1", and a "New" button. Below the header is a sidebar menu with the following items:

- About WordPress (highlighted with a red arrow)
- WordPress.org
- Documentation
- Support Forums
- Feedback

The main content area has a large "Welcome to Wor" heading and a message: "Thank you for updating to the more polished and enjoyable". At the bottom right of the content area are three buttons: "What's New", "Credits", and "Freedoms".

Looks Like its 4.5.2

The screenshot shows a web browser window with a dark theme. The address bar contains several bookmarks: Apps, Alfresco on Linux, Ubuntu Must Have Apps, Drupal Tutorials, Guarddog, VS Studio 2008 Note, Drupal Notes, and Other Bookmarks. The user is logged in as 'Howdy, mchase'.

The main content area displays the WordPress 4.5.2 dashboard. A banner at the top says "WordPress 4.5.3 is available! [Please update now.](#)". Below it, the title "Welcome to WordPress 4.5.2" is prominently displayed. To the right is a blue box with the "W" logo and "Version 4.5.2".

The left sidebar lists various site management options: Dashboard, Jetpack, Posts, Media, Pages, Comments, Appearance, Plugins, Users, Tools, Settings, and FAQ Admin Page. At the bottom of the sidebar is a "Collapse menu" button.

In the center, there are three tabs: "What's New" (selected), Credits, and Freedoms. Below them is a section titled "Maintenance and Security Releases". It mentions that Version 4.5.2 addressed security issues and links to the release notes. It also notes that Version 4.5.1 addressed 12 bugs and links to its release notes.

At the very bottom, a black bar features the text "Introducing WordPress 4.5 'Coleman'" with a link icon, and a "SHARE" button.

Aug 2014 - WP 3.8

A screenshot of a Mac OS X desktop environment. The window title bar shows multiple tabs: "3 of 3 uploaded - YouTube", "Softaculous - Softaculous", "Edit Page < Armadillo Video", "About < Armadillo Video", and "Game Systems | Armadillo". The address bar displays the URL "mikehchase54.net/wpassign1/wp-admin/about.php". The browser toolbar includes icons for Apps, Logout, Download and install, Alfresco Help, Alfresco View topic, VPNClient, Press This, and Other Bookmarks. The main content area of the browser shows the WordPress 3.8 update notice. On the left is a dark sidebar with white icons and text for Dashboard, Posts, Media, Pages, Comments (29), Galleries, Slideshows, Appearance, Plugins (7), Users, Tools, and Settings. The main content area has a yellow header bar with the text "WordPress 3.8.2 is available! Please update now." Below it is the heading "Welcome to WordPress 3.8". To the right is a blue box containing the large white "W" logo and the text "Version 3.8". At the bottom of the content area is a navigation bar with three tabs: "What's New" (highlighted), "Credits", and "Freedoms". The status bar at the bottom of the screen shows the URL "wordpress.org/wp-admin".

(5) More Details are available – I usually review it

The screenshot shows the WordPress.org plugin page for "Google Maps CP". The page features a large map of a city area with several location markers. A prominent red pin marker contains a white "W" logo, representing WordPress. To the right of the pin, the text "CodePeople POST MAP" is displayed. Below the map, there's a navigation bar with tabs: Description (selected), Installation, Screenshots, Changelog, FAQ, Other Notes, and Reviews. The "Description" tab contains a section titled "Google Map features:" with a list of benefits:

- ▶ Insert a Google map in the best position within your blog
- ▶ Deal with large volumes of dots or markers on the Google Maps
- ▶ Uses Google Maps to discover additional entries related to the post
- ▶ The location can be defined by physical address and point coordinates
- ▶ Map markers customization
- ▶ Allows to embed Google Maps in multiple languages
- ▶ Allows several Google Maps controls and configuration options

Below this, there's a text block explaining the plugin's purpose:

Google Maps CP allows to insert a Google Maps in a post or in any of the WordPress templates that display multiple posts.

The Google Maps inserted in a single post displays a marker at the position indicated by the geolocation information pertaining to the post, but also shows markers of the last posts published in related categories. The number of markers to display on the Google Maps can be set in the plugin's settings.

The Google Maps inserted into a template displaying multiple posts will contain as many markers as posts making up the page with the associated geolocation info. When the mouse is hovered over the marker, the post to which it belongs gets highlighted.

Google Maps has a wide range of settings to make your maps more versatile and adaptable.

More about the Main Features of Google Maps CP:

On the right side of the page, there's a sidebar with plugin metadata:

Plugin Settings

- Each plugin works differently
- Some have their own menu options others have settings in the plugin list page
- Read about the plugin, to understand how to use it.

Example Plugin – FAQ Admin Page

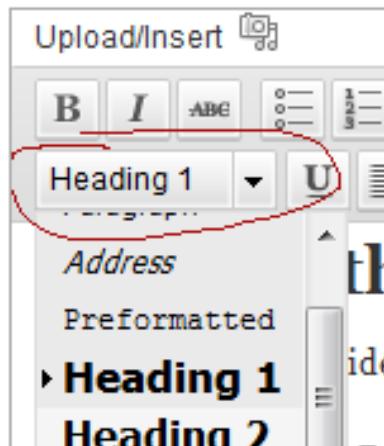

Create an interactive, animated F. plugin by bGentry.

This plugin turns a standard WordPress page into a dynamic animated frequently asked questions pages, it now supports this function.

Here's How...

First, create a page or post and give it this animated functionality. The easiest and most dependable way is to check the checkbox on the editor toolbar under "Format" and select "Dropdown Text." (This box should be beneath the box with the button "B" and "I"). An alternate way is to include "FAQ" or "Frequently Asked Questions" somewhere in the title or URL method when the plugin was created, and is still supported at this time.

Second, type your questions and answers.

You indicate questions and answers in the editor. Format questions as any kind of text or anything else. Paragraphs, lists, video, etc. are reserved to allow you to create content. (See "Troubleshooting" section below).

Third, save the page, then view it.

The plugin creates the accordian FAQ sidebar or other parts of the page.

Synopsis of FAQ Admin

- The short version of the FAQ Admin page says that to make this page work you have to do the following:
- Create a PAGE
- Check the box in the “Make Animated Dropdown Text” on the page
- Add text Questions and answers, each on their own line
- Make the Questions of any header size except H5

The “Make Animated Drop Down Text” block

The screenshot shows the WordPress admin dashboard with the 'Edit Page' screen open for a page titled 'FAQ'. The left sidebar lists various menu items like Dashboard, Posts, Media, Pages, Comments, Appearance, Plugins (with 1 update), Users, Tools, Settings, FAQ Admin Page, SuperCacher, PHP Code, and a Collapse menu. The main content area displays the page content, which includes two questions and answers about game systems. The right sidebar contains a 'Publish' section and a 'Page Attributes' dropdown. A prominent plugin settings panel for 'Make Animated Drop Down Text' is visible, explaining the feature and providing two checkbox options: one for applying the effect to the entire page and another for applying it to specific sections wrapped in shortcodes. At the bottom of the sidebar, there are 'Yes', 'No', and 'Default from plugin' buttons.

Posts and Pages

WordPress has two main types of content, posts and pages.

Posts and pages are used for very different things, so it's important that you understand both the similarities and differences between them.

WordPress Pages

- Creating Pages and page content
- Using Plugin to create an FAQ page
- Using Plugin to create the Contact Us Form
- **When to use Text vs. View mode for the content block**
 - Spoiler – only use text mode on PHP code!

WordPress Pages

Pages are organized as static elements

- They live on their own, not related to any other item.
- There may be one type of page relationship.
 - A page may be related to a page below or above it (on a menu) this is a parent child relationship.

WordPress Page Presentation

Pages are presented as single elements.

Pages **do not have categories or tags**, and generally do not have navigation based on page content.

Pages have custom templates (posts don't).

Pages have dedicated URLs – easy to find a page

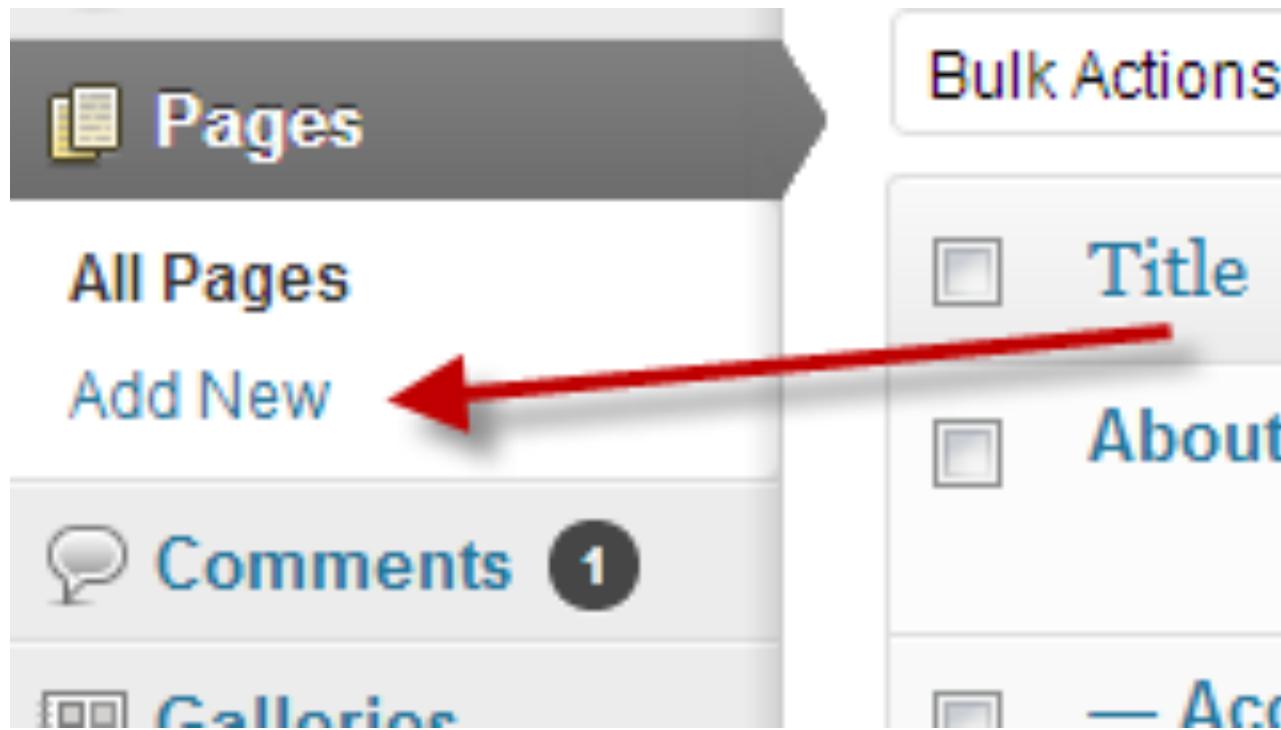

An about page example URL: ***mysite.com\about***

TIP – To check to see if a link is a page link, run and hold your mouse over the link, and look at the URL at bottom of browser. If it's a simple URL, it's probably a page.

When to use A Page In WordPress

- Pages are **for static content**, information that doesn't change much, like an about page or office hours, or location map.
- Pages are **non-relational** (except for page to page relationships in the menu)
- Pages are considered permanent fixtures. If the content should have its own button, chances are it should be a page.
- Pages are **macro level content**, meaning they contain **information about the site**, not current content on the site.

Creating a WordPress Page

The Add new Page Form

The screenshot shows the WordPress admin interface for creating a new page. The left sidebar is dark-themed with white text and icons. A yellow box highlights the 'Pages' menu item, which is currently selected. An arrow points from this highlighted area towards the 'Add New' button in the sub-menu. The main content area is titled 'Add New Page' and contains a text input field labeled 'Enter title here'. Below it is a rich-text editor toolbar with various buttons for bold, italic, underline, etc. To the right of the toolbar is a 'Publish' section containing buttons for 'Save Draft', 'Preview', 'Status: Draft' (with an edit link), 'Visibility: Public' (with an edit link), and 'Publish immediately' (with an edit link). A large blue 'Publish' button is at the bottom of this section. On the far right, there's a 'Page Attributes' sidebar with fields for 'Parent' (set to '(no parent)') and 'Order' (set to '0'). A note at the bottom of the sidebar says 'Need help? Use the Help tab in the upper right of your screen.' The top right of the screen shows 'Screen Options' and 'Help' dropdowns.

Setting Screen Options

- Select the Screen Option button
- The best way to view the Add New Page, is to shrink the web browser width until the Add New Page shrinks and changes to a one column page.
- This way you see all the parts of the page in a single column.

Pages , Screen Options

The screenshot shows the WordPress admin interface for adding a new page. The top navigation bar includes the site title "Armadillo Video Game Resale", a notification badge "1", a "New" button, and a user profile "Howdy, mchase". The left sidebar features a vertical menu with icons for Home, Posts, Media, Pages (selected), Comments, and Appearance. The main content area has a heading "Show on screen" followed by several checkbox options. Three specific checkboxes are highlighted with red boxes: "Discussion" (checked), "Author" (unchecked), and "Screen Options". Other visible options include "Associate an address to the post for Google Maps association", "Custom Fields", "Basic SEO Meta Tags", "Page Attributes", "Make Animated Dropdown Text", and "Featured Image". Below these options, there is a large "Add New Page" button and a placeholder "Enter title here". A "Screen Options" button is located at the bottom right of the main content area.

Pages > Screen Options

Checked is enabled, un-checked is disabled

The screenshot shows the 'Screen Options' section of the WordPress admin interface for the 'Pages' screen. The 'Show on screen' section contains several checkboxes:

- Associate an address to the post for Google Maps association
- Discussion
- Slug
- Author
- Basic SEO Meta Tags
- Page Attributes
- Make Animated Dropdown Text
- Featured Image

A red box highlights the 'Discussion' checkbox. Another red box highlights the 'Author' checkbox. A third red box highlights the 'Screen Options' button at the bottom right of the section.

Other visible elements include the WordPress logo, the site title 'Armadillo Video Game Resale', a notification count of 1, a 'New' button, and a user profile 'Howdy, mchase'. On the left, there's a vertical sidebar with icons for Home, Posts, Media, Pages (which is selected), Comments, and Appearance.

Fill Out The Add new Page Form

The screenshot shows the WordPress admin interface for creating a new page. The top navigation bar includes the site title "Armadillo Video Game Resale", a message icon with "1", and a "New" button. The left sidebar menu is visible, with "Pages" highlighted in dark grey. The main content area is titled "Add New Page". Below the title is a large, empty text editor area. To the right of the editor is a toolbar with the "Add Media" button and a row of 17 small icons representing various rich text and media editing functions: bold (b), italic (i), link, b-quote, del, ins, img, ul, ol, li, code, more, lookup, close tags, and fullscreen.

Fill Out The Add new Page Form

Add New Page

Enter title here **A**

B

C

D

E

The image shows a screenshot of a rich text editor interface. At the top left is a document icon followed by the text "Add New Page". Below this is a text input field with the placeholder "Enter title here" and a large red letter "A" inside it. To the right of the input field is a toolbar with several icons: a camera (Add Media), bold (B), italic (I), font size (ABE), alignment (text orientation), quotes (" " and “ ”), lists (bullet and numbered), a link icon, a table icon, a checkmark icon, a list icon, and a grid icon. Below the toolbar is a "Paragraph" dropdown menu and a row of additional icons: underline (U), alignment (text orientation), font style (A), a calendar icon, a file icon, a magnifying glass icon, a Greek letter icon, a list icon, a grid icon, a refresh icon, and a question mark icon. To the right of the toolbar are two tabs: "Visual" (highlighted) and "Text". The main area below the toolbar is mostly blank, with a large red letter "E" centered in it.

Add Page Parts

- A – Page Name (Required)
- B – Editor Window Mode/View (Visual vs. Text)
- C – Add Media Button (For Images)
- D – WYSIWYG (In Visual Mode/View)
- E – The Content Block

Visual Vs Text

- Visual – For 90% of your work, use this. You get a WYSIWYG editor.
 - It's easy to use, and it hides the HTML code
- Text – When you want to add PHP code or need to tweak the HTML
 - Shows the HTML

Visual Mode = WYSIWYG

The image shows a screenshot of a WYSIWYG (What You See Is What You Get) editor interface. At the top, there's a toolbar with various icons for text formatting, including bold (B), italic (I), underline (U), and alignment (A). To the left of the toolbar is an "Add Media" button. To the right are two tabs: "Visual" (which is selected) and "Text". Below the toolbar, the main area contains the text "WYSIWYG" in large, bold, red letters. Above this red text, the word "VISUAL: MODE" is displayed in a larger, bold, black font. The background of the editor is white.

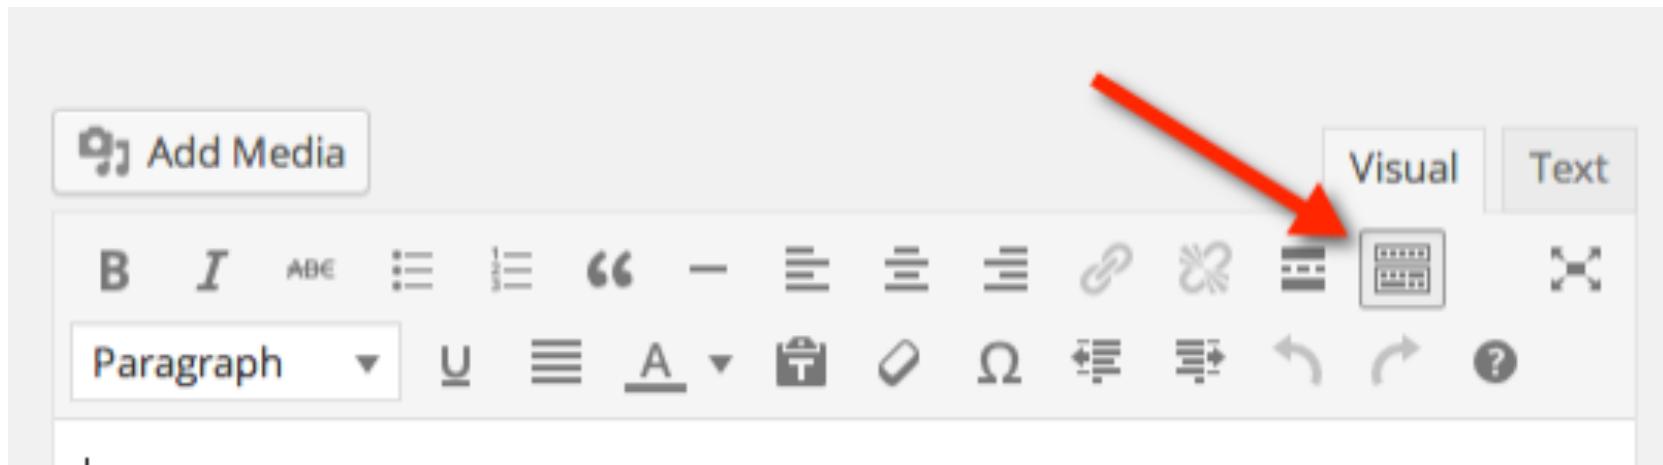

With Kitchen Sink Hidden

The image shows a WordPress editor interface. At the top, there's a toolbar with various buttons: Bold (B), Italic (I), ABC, Alignment (center, right, left), and other styling options. Below the toolbar, the text "Insert More TAG" and "Show/Hide Kitchen Sink" is displayed in large, bold, black font. Two red arrows point from the text up towards the toolbar, specifically to the "Insert More TAG" button (which looks like a gear icon) and the "Show/Hide Kitchen Sink" button (which looks like a grid icon).

Insert More TAG
Show/Hide Kitchen Sink

The Insert More tag inserts a “More Tag” into the text. This shows as “Continue Reading → “ link on the post text

Kitchen Sink Shown

The Kitchen Sink button shows and hides the lower half of the WYSIWYG menu

Text

The image shows a text editor interface with the following elements:

- Toolbar:** A horizontal bar at the top with the following buttons: "Add Media" (with a camera icon), "Visual" (selected), and "Text". Below this are buttons for bold ("b"), italic ("i"), link (highlighted in blue), b-quote, del, ins, img, ul, ol, li, code, more, lookup, close tags, and fullscreen.
- Text Area:** A large text area containing the text "TEXT MODE" in a large, bold, red font.
- Status Bar:** A thin horizontal bar at the bottom of the text area.

Text Mode Example – FAQ Content

`<h1>Q: What games and game systems do you sell?</h1>`

A: We accept the following games and game systems for the following:

Microsoft Xbox One

Microsoft Xbox 360

Nintendo 3Ds XL

Nintendo Wii

Nintendo Wii U

Sony Playstation 3

Sony Playstation 4

Sony Playstation Vita (Wi-Fi)

`<h1>Q: How do I donate games and game systems to you?</h1>`

A: We have a contact us form on the website. Fill it out and list the games and game systems and their condition. We will contact you and arrange the best method to send us your stuff

`<h1>Q: Will I get a tax credit for game and game system donations?</h1>`

A: If we were a legit company yes. But we are actually a test case for IT 320 Introduction to CMS, so the answer is no.

`<h1>Q: What charity do you support?</h1>`

A: Wildlife Rescue of Austin Texas:

Please Turn Off Discussion on all Embedded PHP Pages

- STEPS:
 - After creating and editing the page, select the Screen Options dropdown
 - Un-check (turn off) Discussion, then update the page

Select Screen Options Dropdown

The screenshot shows the WordPress admin interface for editing a page titled 'About'. The top navigation bar includes links for Logout, Download and install, Alfresco Help, Alfresco View topic, VPNClient - Communi..., Press This, and Other Bookmarks. A user profile 'Howdy, mchase' is visible. On the left, there's a sidebar with a 'Comments' section showing 29 notifications. The main content area has a message about WordPress 3.8.2 being available. The 'Edit Page' toolbar includes buttons for Add Media, Insert Slideshow, Visual, Text, and various rich text tools like bold, italic, link, and code. The page content area contains the text: Business Address: Armadillo Video Game Resale Shop. To the right, the 'Publish' sidebar shows the status as Published, visibility as Public, and 11 revisions. A red arrow points to the 'Screen Options' dropdown in the top right corner.

Turn Off Discussion, Update Page

The screenshot shows the WordPress admin interface for editing a page. At the top, there's a navigation bar with links like 'Logout', 'Download and install', 'Alfresco Help', 'Alfresco • View topic', 'VPNClient – Communi...', 'Press This', '» Other Bookmarks', and the user 'Howdy, mchase'. Below the navigation is a header for the page titled 'Video Game Resale' with stats: 11 revisions, 29 comments, a '+ New' button, and a 'View Page' link. On the right, it says 'Howdy, mchase' with a user icon.

The main area is titled 'Edit Page' with a sub-section 'Add New'. Under 'Edit Page', there's a 'Screen Options' button. In the center, there's a 'Show on screen' section with several checkboxes:

- Associate an address to the post for Google Maps association
- Revisions
- Custom Fields
- Discussion [Red arrow pointing here]
- Slug
- Author
- Basic SEO Meta Tags
- Page Attributes
- Make Animated Drop Down Text
- Featured Image

Below these settings, there's a 'Screen Layout' section with 'Number of Columns:' and radio buttons for 1 or 2 columns, with 2 selected. At the bottom left, there's a message: 'WordPress 3.8.2 is available! Please update now.'

What Does the Discussion Setting Do?

- Allows comments to be entered on a page
- When this is enabled, code gets added that allows visitors to “Leave a Reply”
- If you are logged into the site, your login name is listed as well

Google Maps CP Plugin – 2016

Same great plugin, just a new name

The screenshot shows the WordPress admin interface under the 'Plugins' menu. On the left, a sidebar lists various admin options like Dashboard, Jetpack, Posts, Media, Pages, Comments, Appearance, and Plugins. The 'Plugins' option is currently selected and highlighted in blue. The main area is titled 'Add Plugins' with tabs for 'Search Results', 'Featured', 'Popular', 'Recommended', and 'Favorites'. A search bar at the top right contains the keyword 'Google Map CP'. Below the search bar, there are five plugin cards. The first card, 'Google Maps CP', is highlighted with a red arrow pointing to its title. It features a colorful icon of a map pin, the title 'Google Maps CP' in bold, a brief description about associating geolocation with posts, the author 'By CodePeople', a 5-star rating with 22 reviews, 20,000+ active installs, and compatibility with the user's version of WordPress. The second card, 'Canalplan', has a green plaid icon, a 5-star rating with 0 reviews, and 0+ active installs. The third card, 'Gallery - Photo Albums - Slider - Portfolio', has a blue circular icon with icons for photo, video, music, and map, a 5-star rating with 161 reviews, 10,000+ active installs, and compatibility with the user's version of WordPress. The fourth card, 'OpenTickets Community Edition', has an orange circular icon with a ticket stub, a 5-star rating with 26 reviews, 800+ active installs, and compatibility with the user's version of WordPress. The fifth card is partially visible on the right.

Google Maps Steps

1. Search for and install the Google Maps CP Plugin
2. Activate the plugin
3. Create (or edit existing) “About Us” page
4. Scroll down and complete the Map portion of the page settings
5. Verify the address, Create the MAP TAG
6. Publish new or Update existing page
7. Test the page. Is the Map showing up?

The Plugin is “Google Maps CP” is installed

The screenshot shows the WordPress admin interface under the 'Plugins' section. A yellow box highlights the 'Plugins' menu item in the sidebar. Another yellow box highlights the 'Google Maps CP' plugin entry in the main list.

WordPress Page Example

What do WordPress pages have in common when displayed on a web page?

1. A menu link to the page
2. The URL of the page (In the web browser)
3. No visible categories or dates on the page
4. No visible tags
